Advanced Dynamics for Hospital Accountants

Ref: 3061_152238 **Date:** 16 – 20 August 2027 **Location:** Toronto (Canada) **Fees:** 6600 GBP

Introduction

Welcome to the Advanced Dynamics for Hospital Accountants course! This course is specifically designed to provide professionals in hospital accounting with the essential tools and techniques to master the complexities of healthcare financial management. Whether you're managing hospital financial reports, overseeing hospital cost management, or involved in financial planning and analysis of healthcare, this course covers the vital aspects of accounting in healthcare.

The curriculum will guide you through the critical components of hospital finance, from accounts payable to budgeting and forecasting techniques. You'll also learn how to apply advanced dynamics in hospital accounting to improve the efficiency and accuracy of your financial operations. Additionally, we will explore behavioral concepts tied to day-to-day accounting practices, enhancing the strategic and operational management of financial resources in healthcare settings.

Important note: Course registration for 3 or more participants in Istanbul guarantees a 1-day site visit to a prestigious public or private hospital, offering firsthand exposure to hospital financial management.

Course Objectives

By the end of this course, you will be able to:

- Identify the main elements of a vision for finance and accounting specific to hospital operations, helping you manage financial strategy and day-to-day accounting needs in a healthcare environment.
- Evaluate and improve the accounts payable process within a hospital, ensuring efficiency and accountability in all financial transactions.
- Understand the key best practices in receivables, inventory, and cash management to enhance the financial flow and stability of your healthcare organization.
- Apply MS Excel reporting and analysis techniques to streamline accounting and finance operations, improving speed and accuracy in financial reporting.
- Develop an enhanced understanding of the behavioral concepts related to daily financial operations, ensuring better decision-making and smoother organizational workflows.
- Evaluate the budgeting process within your organization and recommend improvements for greater financial sustainability.
- Learn to create budget templates and models tailored to healthcare departments or hospitals, enhancing the clarity and effectiveness of financial planning.
- Master forecasting techniques that allow you to manage uncertainty in budgeting and hospital financial planning effectively.
- Assess and apply advanced capital budgeting evaluation techniques using [illegible] and payback period to make informed investment decisions.

- Utilize Excel functions in the budgeting process, including tools for breakeven analysis and optimization.

Course Outlines

Day 1: Accounting Fundamentals and Reporting

- Introduction to Financial Reporting in Healthcare: Understanding the environment of financial reporting in hospitals.
- Overview of the balance sheet, income statement, cash flow statement, and their relevance in hospital accounting.
- Best practices in cash and receivables management in hospital settings.
