Advanced Financial Economics and Management Leadership

Ref: 3254734_176122 **Date:** 27 September – 14 October 2027 **Location:** Lyon (France) **Fees:** 14800 GBP

Introduction

The Advanced Financial Economics and Management Leadership course is designed to provide participants with a comprehensive understanding of the intersection between finance, economics, and management leadership practices. Over the course of 3 weeks, this program will equip professionals with the essential skills and insights needed to lead in a complex and rapidly evolving financial environment. Participants will engage with modern economic theories, leadership practices, and strategic decision-making processes that enable effective leadership in advanced financial management roles. This course focuses on developing essential skills for financial professionals, enabling them to handle financial challenges, lead teams, and drive organizational success through strong leadership and strategic financial decision-making.

Course Objectives

By the end of this course, participants will be able to:

- Master the fundamentals of financial economics, including market behavior, pricing, and risk management.
- Analyze and interpret financial data, while understanding the major economic factors influencing business decisions.
- Develop strategic financial management skills, including financial modeling, budgeting, and capital allocation.
- Enhance leadership skills with insights into modern leadership techniques, communication strategies, and team-building for financial professionals.
- Apply real-world scenarios and case studies, solving complex financial problems through interactive discussions and critical thinking.
- Strengthen decision-making capabilities with an understanding of financial economics principles, risk management, and ethical leadership in financial roles.

Course Outlines

Day 1-3: Introduction to Financial Economics and Major Economic Environment

- Overview of financial economics: core concepts and models.
- Understanding market behavior and economic cycles and their impacts on financial decisions.
- Key economic indicators and their influence on business strategy.
- The role of inflation, interest rates, and their effects on financial strategy.

Day 4-6: Financial Decision-Making and Risk Management
