Introduction

Government assets and properties are among the most valuable resources owned by public institutions, requiring stringent internal audit processes to ensure their protection, enhance their efficient utilization, and achieve compliance with established regulations and standards. This training course is designed to equip mid-level professionals with the knowledge and practical skills necessary to conduct effective internal audits of government assets and properties, focusing on challenges specific to the public sector and ways to overcome them.

In this course, participants will gain insights into the core concepts of internal auditing, risk assessment techniques, asset and property management practices, and how to improve compliance with government policies and international standards. The course also includes practical applications of the internal audit process in the public sector, helping participants enhance transparency and accountability in managing government assets.

Course Objectives

By the end of this course, participants will be able to:

- Enhance their understanding of the fundamental concepts of internal auditing for assets and properties in government institutions.
- Apply the latest techniques and methodologies in risk-based internal audit and control evaluation professionally.
- Improve compliance with government policies and international standards related to asset and property management.
- Develop effective and integrated audit procedures tailored to the public sector.
- Strengthen transparency and accountability in managing government assets and properties.
- Connect their previous experience with modern practices in internal auditing.

The graphic features the text 'UK Training' in a small, grey font above the word 'PARTNER' in a large, bold, black font. This text is positioned over a background of concentric grey circles and a chessboard pattern. In the foreground, three chess pieces—a gold king, a silver pawn, and a black pawn—are visible on the chessboard squares.
