Ref: 3255623_206363 **Date:** 12 – 23 April 2027 **Location:** Paris (France) **Fees:** 10600 GBP

Introduction

As global financial systems increasingly shift toward sustainable finance, integrating Environmental, Social, and Governance ESG principles has become essential in reserve asset management. Central banks, sovereign wealth funds, and institutional investors are progressively incorporating sustainability frameworks into their gold reserve strategies.

This intensive 10-day advanced program provides participants with a deep strategic and technical understanding of sustainable gold reserve management. It covers ESG integration across policy, operations, governance, reporting, and risk management, while enhancing analytical and strategic capabilities.

The course combines global best practices, regulatory frameworks, risk modeling techniques, governance controls, case studies, and applied workshops to ensure participants gain practical, implementable skills.
