Financial Management and Reporting for the Public Sector (IFRS and IPSAS)

Course Introduction

This Ten-day Financial Management and Reporting for the Public Sector IFRS and IPSAS training course will cover the following:

The diminishing differences between generally accepted accounting principles GAAP, principally established by the Financial Accounting Standards Board FASB, and International Financial Reporting Standards IFRS, as established by the International Accounting Standards Board IASB, are narrowing at a faster pace. IFRS is now the world's most widely accepted and applied accounting standard with more than 100 countries now requiring or permitting their use.

IPSAS is becoming and will become the World standard for Public Sector entities. IFRS having replaced IAS is now becoming the world standard, but in many ways was not specific enough to the needs of the Public Sector. The United Nations and World Bank coming to this realisation have favored IPSAS which is a modified form of IFRS tailored to the Public Sector.

This training course will help participants meet the challenges of introducing IFRS and IPSAS, and secure the benefits of improved financial management to help secure organisational objectives and goals of each public service organisation. It will also compare IFRS against IPSAS so that the participants can see the main differences.

The key topics covered are:

- Context of IFRS and IPSAS
- The basic concepts of accounting and financial reporting disclosures and varying reconciling and non-reconciling differences between GAAP and IFRS & IPSAS
- Financial statement presentation of IFRS and IPSAS
- Funding, revenue, and expenditure of IFRS and IPSAS
- Asset and liability reporting of IFRS and IPSAS
- Entity consolidation and combination of IFRS and IPSAS
- The scope, structure, contents, and components of IFRS and IPSAS compliant financial statements, including underlying assumptions and related footnotes disclosures
