Governance, Risk, and Compliance (GRC)

Introduction

The fields of corporate and public governance, risk management, and compliance GRC have gained significant attention in recent years, becoming central topics in business schools and legislative discussions globally. These interconnected systems are crucial for fostering accountability, managing risks, and ensuring regulatory compliance.
This comprehensive course explores the definition of governance risk and compliance, highlights their strategic importance, and delves into practical tools and frameworks such as COSO guidelines and OECD standards. Participants will learn how governance risk and compliance technology can be leveraged to optimize business operations and maintain transparency across local governance and global governance structures.

This training is essential for professionals aiming to master the principles of information governance, strengthen internal controls, and adapt to evolving business environments.

Course Objectives

By the end of this course, participants will:

- Clearly understand what governance risk and compliance is and its role in modern organizations.
- Analyze the definition of governance and its various applications in global and local governance contexts.
- Explore the governance process and its integration with risk management and compliance frameworks.
- Learn about governance risk and compliance requirements and qualifications for implementing effective internal controls.
- Develop actionable strategies to address global risk and compliance challenges.
- Gain practical knowledge about auditing systems to ensure alignment with governance compliance meaning and industry standards.

Course Outlines

Day 1: Foundations of Governance, Risk Management, and Compliance
