Environmental Management and Sustainability

Ref: 3254811_322024 **Date:** 7 – 11 March 2027 **Location:** Amman (Jordan) **Fees:** 4900 GBP

Introduction

The Environmental Management and Sustainability Course offers an in-depth exploration of the essential concepts and practices in environmental management. Designed for professionals aiming to excel in environmental management positions, this course equips participants with practical knowledge to develop and implement an Environmental Management System EMS, ensuring alignment with ISO 14001 standards. Through a comprehensive understanding of environmental sustainability, participants will learn to minimize environmental impact, enhance corporate sustainability, and integrate sustainable environmental management practices into their organizations.

By mastering the latest strategies in management and sustainability, participants will be prepared to address global environmental challenges and lead sustainability initiatives within their business operations. Whether managing facilities management and sustainability or focusing on project management and sustainability, this course provides the essential tools to make impactful, eco-friendly decisions.

Course Objectives

By completing this Environmental Management and Sustainability Training, participants will be able to:

- Understand what environmental management and environmental management systems are.
- Identify environmental risks and apply effective environmental management strategies.
- Develop and implement an Environmental Management Plan based on ISO 14001.
- Promote sustainable business practices, including green procurement and sustainability recycling.
- Enhance organizational responsibility through corporate sustainability initiatives.
- Integrate sustainability in business through strategic planning and sustainability management.
- Monitor, report, and continuously improve environmental performance.
