# Intercompany Transactions, Anti-Avoidance Risks & Sector-Specific Challenges

## Introduction

In today's global business world, intercompany transactions are a key issue that requires a deep understanding of pricing practices, risk management, and tax avoidance strategies, especially with sector-specific challenges. Intercompany transactions have become more complex with the rise of intricate business models and multinational operations. This course aims to explore the critical aspects of intercompany transactions, the risks of tax avoidance, and the challenges specific to different sectors, along with best practices for addressing them.

Throughout this course, participants will gain insights into managing the risks associated with tax avoidance in intercompany transactions and how to address sector-specific challenges through a comprehensive understanding of relevant regulatory frameworks. Participants will also learn best practices for ensuring compliance with both local and international tax laws.
