Business Strategy Sustainability

Introduction

In today's rapidly changing and competitive business landscape, business sustainability and sustainable business strategies have become critical goals for executives and decision-makers across the Middle East and North Africa. Organizations face increasing pressure to design strategies that ensure long-term growth and resilience in the face of shifting market demands.

But what is sustainability in business? It's about creating strategies that balance economic performance with social and environmental impact—driving sustainable business development and fostering resilient organizations.

This comprehensive training course is designed to empower professionals at every level—from early- and mid-career employees looking to enhance their core skills, to team leaders and senior managers aiming to strengthen their strategic and leadership abilities. Participants will learn how to integrate sustainability principles into their business strategy for sustainable development, using proven tools and global best practices to achieve tangible, measurable results across various sectors, including oil and gas, banking and financial services, telecommunications, HR, marketing and sales, and project management.

Course Objectives

By the end of this course, participants will be able to:

- Understand the definition of business sustainability and its role in driving growth.
