Workshop on Document Management and Electronic Archiving For 3 Days

Introduction

In today's rapidly evolving digital landscape, managing documents electronically has become essential for improving efficiency, ensuring data security, and maintaining organized workflows. Traditional paper-based systems can no longer keep up with the speed and complexity of modern operations, making digital transformation a strategic necessity rather than an option.

This course provides a practical and well-structured approach to electronic document management and digital archiving. It focuses on how organizations can streamline document processes, enhance accessibility, and implement reliable systems that support long-term performance and compliance.

Workshop Objectives

By the end of this course, participants will be able to:

- Understand the core principles of electronic document management and digital archiving.
- Apply best practices in document digitization and organization.
- Design effective document lifecycle management processes.
- Utilize technologies such as OCR and AI to improve document handling.
- Develop policies and procedures aligned with regulatory standards.
- Enhance workflow efficiency while reducing operational expenses.

Workshop Outlines
