# ESG, Sustainability and Corporate Governance

## Introduction

The ESG, Sustainability, and Corporate Governance course focuses on helping organizations understand how environmental, social, and governance practices affect strategy, risk, reputation, compliance, and long-term performance. Sustainability is no longer treated as a separate reporting activity. It is now connected to business decisions, stakeholder expectations, investment confidence, operational resilience, and responsible governance.

This course explains the main components of ESG, sustainability planning, governance structures, stakeholder expectations, reporting practices, and performance measurement. It also covers how organizations can identify material issues, manage sustainability risks, define governance responsibilities, and align ESG initiatives with corporate strategy.

The course is delivered over five connected days. It begins with ESG and sustainability fundamentals, then moves into corporate governance, materiality and stakeholder engagement, ESG reporting and performance indicators, and finally implementation, monitoring, and continuous improvement. The content is aligned with the provided course topic.
