Financial Literacy for Non-Financial Decision Makers

Ref: 3254938_326471 **Date:** 1 – 5 March 2027 **Location:** Prague (Czech) **Fees:** 5200 GBP

Introduction

In today's data-driven, cost-conscious business environment, decision-makers at all levels—whether they work in marketing, HR, operations, or project management—are increasingly expected to understand financial concepts. Financial decisions are no longer confined to finance departments; they now influence every strategic and operational move across organizations.

This course is tailored for executives, team leaders, department heads, and professionals from both public and private sectors in the Middle East and North Africa. It is especially valuable for individuals in industries such as oil and gas, telecommunications, finance, government, human resources, and sales who seek to enhance their impact by making financially informed decisions.

The course demystifies financial terminology, simplifies key concepts, and equips non-financial professionals with the tools needed to understand financial reports, communicate effectively with finance teams, and make better decisions that align with their organization's financial health and goals.

Course Objectives

- Understand basic financial and accounting principles.
- Learn how to read and interpret financial statements balance sheet, income statement, cash flow statement.
- Use financial ratios and indicators to evaluate organizational performance.
- Communicate effectively with finance professionals and auditors.
- Analyze costs, revenues, and profit margins in operational decisions.
- Make data-driven decisions based on financial information.
- Build and manage simple operational budgets.
- Differentiate between capital and operational expenditures.
- Identify financial risks related to business initiatives.
- Contribute to cost control and resource optimization in your department.
