Risk-Based Lending and Credit Risk Management & Credit Writing & Analysis, Loan Recovery & Monitoring

Ref: 3255342_338879 **Date:** 5 – 9 July 2027 **Location:** Prague (Czech) **Fees:** 5200 GBP

Introduction

In today's complex and evolving financial landscape, risk-based lending and credit risk management have become essential pillars of sustainable banking operations. With increasing market volatility, regulatory scrutiny, and competitive pressures, financial institutions must adopt more sophisticated risk assessment, loan structuring, and portfolio monitoring practices to ensure profitability while minimizing exposure.

The Risk-Based Lending and Credit Risk Management & Credit Writing & Analysis, Loan Recovery & Monitoring course provides participants with a comprehensive understanding of modern credit principles, analytical tools, and risk frameworks. It covers the entire credit lifecycle — from risk-based pricing and credit analysis to loan recovery and portfolio monitoring — ensuring that participants gain the expertise to make informed, data-driven lending decisions.

This program is designed for middle and senior management professionals, credit officers, financial analysts, risk managers, and recovery teams who are responsible for managing lending portfolios, mitigating credit risks, and maintaining institutional credit quality.

Course Objectives

- Understand the core principles of risk-based lending and credit management.
- Assess and quantify credit risk using both qualitative and quantitative models.
- Develop and implement effective credit policies and lending frameworks.
- Enhance analytical and credit writing skills for informed decision-making.
- Identify early warning signals and design proactive monitoring systems.
- Apply best practices in loan recovery and restructuring.
- Measure portfolio performance through key credit and risk indicators.
- Strengthen governance and accountability within credit operations.

Course Outlines

Day 1: Principles of Risk-Based Lending

- Definition and framework of risk-based lending.
- The link between risk, pricing, and profitability in credit decisions.
- Fundamentals of credit scoring and borrower classification.
- Credit portfolio diversification and exposure management.
- Comparing traditional and modern lending approaches.
