Advanced Accounting & Finance Management Course

Ref: 3255385_339963 **Date:** 11 – 22 October 2027 **Location:** Kuala Lumpur (Malaysia) **Fees:** 8800 GBP

Introduction

In today's complex and ever-changing business environment, finance and accounting professionals face growing challenges in delivering accurate analyses and strategic insights for decision-making. The Advanced Accounting & Finance Management Course is designed to equip participants with a deep understanding of advanced accounting concepts, corporate finance, governance, and risk management.

Through real-world case studies, practical exercises, and interactive discussions, participants will gain mastery in financial statement analysis, budgeting, investment evaluation, and corporate finance decision-making. By the end of the course, they will possess the knowledge and tools to enhance financial performance and contribute effectively to their organization's strategic objectives.

Course Objectives

By the end of this course, participants will be able to:

- Understand the scope and objectives of advanced accounting and financial management.
- Interpret financial statements in accordance with IFRS, FAS, SEC, and other standards.
- Apply budgeting, planning, and variance analysis techniques for better decision-making.
- Evaluate financial performance using ratios, discounted cash flow DCF, and other key metrics.
- Integrate corporate governance and risk management into financial practices.
- Analyze capital structure, investment projects, and cost of capital WACC.
- Use advanced tools for working capital management, forecasting, and reporting.
- Communicate financial information effectively to internal and external stakeholders.
- Apply strategic thinking in accounting, finance, and governance processes.

Course Outlines

Day 1: Introduction to Advanced Accounting & Finance

- Definition and significance of advanced accounting.
- The internal role of the finance and control function.
- Key accounting policies and standards.
- Overview of corporate governance and risk management principles.
