Pensions Scheme Investment Toolkit

Ref: 3255387_340035 **Date:** 15 – 19 February 2027 **Location:** Toronto (Canada) **Fees:** 5900 GBP

Introduction

The Pensions Scheme Investment Toolkit course is a comprehensive training program designed to provide participants with a deep understanding of how pension schemes function and how their funds are invested to ensure long-term sustainability and growth. It offers an in-depth exploration of pension scheme structures, investment frameworks, risk management techniques, and regulatory considerations that shape strategic decision-making. Participants will explore various pension investment models and learn to design, manage, and evaluate investment portfolios that align with scheme objectives and fiduciary responsibilities.

Course Objectives

- Understand the structure, objectives, and functioning of pension and retirement funds.
- Gain comprehensive knowledge of investment principles applied to pension assets.
- Develop analytical skills to assess performance, risk, and asset allocation strategies.
- Learn how to comply with regulatory requirements and governance standards for pension investments.
- Strengthen decision-making skills in designing and managing diversified investment portfolios.
- Master the use of performance metrics and reporting tools for continuous monitoring and optimization.
