Introduction

Occupational Health and Safety OH&S has become a strategic priority for organizations seeking to protect employees, reduce workplace incidents, enhance operational performance, and comply with legal and regulatory requirements. In today's dynamic work environments, organizations must establish robust Occupational Health and Safety Management Systems OHSMS to proactively manage risks and create safer workplaces.

This comprehensive training course provides participants with the knowledge and practical skills required to plan, implement, manage, maintain, and continually improve an Occupational Health and Safety Management System based on ISO 45001:2018. Participants will gain a thorough understanding of the standard's requirements, implementation methodologies, hazard identification techniques, risk management practices, legal compliance obligations, and performance evaluation processes.

The course prepares professionals to lead ISO 45001 implementation projects, support certification initiatives, improve workplace safety performance, and foster a strong safety culture throughout their organizations.
