PMI Professional in Business Analysis (PMI-PBA)

Ref: 3255869_354302 **Date:** 15 – 19 February 2027 **Location:** Accra (Ghana) **Fees:** 4200 GBP

Introduction

The PMI Professional in Business Analysis PMI-PBA certification has become one of the most respected and sought-after professional credentials in the field of Business Analysis. It represents a globally recognized standard for professionals who are responsible for identifying business needs, managing requirements, supporting informed decision-making, and maximizing the value delivered through projects and organizational initiatives. As organizations continue to embrace digital transformation, adapt to evolving business models, and respond to increasing stakeholder expectations, there is a growing demand for professionals who can effectively align business requirements with strategic objectives through structured Business Analysis practices.

This training course provides a comprehensive framework for understanding Business Analysis methodologies based on the internationally recognized standards and best practices established by the Project Management Institute PMI. It focuses on Business Analysis planning, stakeholder engagement, requirements elicitation, requirements analysis, documentation, solution evaluation, and requirements life cycle management. The course also explores modern Business Analysis tools, techniques, and methodologies that enable organizations to improve decision-making, reduce project risks, and increase the success of strategic initiatives.

Covering the complete Business Analysis lifecycle, this course aligns with the knowledge domains of the PMI Professional in Business Analysis PMI-PBA certification. Participants will gain a comprehensive understanding of globally recognized Business Analysis practices, current industry trends, and practical approaches for supporting organizational performance, delivering business value, and enhancing project success.

Course Objectives

By the end of this training course, participants will be able to:

- Understand the fundamental concepts and principles of Business Analysis based on the PMI Professional in Business Analysis PMI-PBA framework.
- Explain the role of Business Analysis in supporting successful projects and achieving organizational strategic objectives.
- Plan Business Analysis activities in alignment with project requirements and stakeholder expectations.
- Identify business needs and analyze business problems and opportunities using structured methodologies.
- Apply effective techniques for eliciting, analyzing, documenting, and managing business requirements.
- Manage the requirements life cycle to ensure alignment with business objectives.
- Analyze stakeholders and evaluate their roles, influence, and expectations throughout project and organizational initiatives.
- Utilize Business Analysis tools and techniques to support informed decision-making.
- Evaluate alternative solutions and recommend the most suitable options for maximizing business value.
- Measure solution performance and assess whether business objectives and expected benefits have been achieved.
- Integrate Business Analysis practices with Project Management methodologies and Agile approaches.
- Strengthen readiness for the PMI Professional in Business Analysis PMI-PBA certification by understanding its knowledge domains, examination structure, and key concepts.
