Integrated Management and Business Administration Program

Ref: 3256010_358705 **Date:** 26 April – 7 May 2027 **Location:** Cape Town (South Africa) **Fees:** 7600 GBP

Introduction

Modern managers are expected to understand more than their individual area of responsibility. Effective business management requires an integrated view of strategy, leadership, operations, finance, people, marketing, technology, and organizational performance.

The Integrated Management & Business Administration Program is designed to provide participants with this broader perspective. Over one week, the program connects essential management disciplines and demonstrates how they influence one another in achieving organizational objectives.

Through practical frameworks, business analysis techniques, financial tools, leadership concepts, process improvement approaches, and integrated case studies, participants will develop the knowledge required to make better decisions, improve performance, and contribute more effectively to organizational success.

Course Objectives

By the end of the course, participants will be able to:

• Develop and align strategic objectives with organizational goals and KPIs.

• Apply modern leadership approaches to manage teams and organizational change.

• Improve business processes, operational efficiency, and resource utilization.

• Understand project management principles, risks, constraints, and performance requirements.

• Interpret financial statements and use financial ratios to assess business

performance.

• Apply budgeting, cost analysis, break-even, ROI, and investment evaluation techniques.

• Align human capital strategies with business objectives and organizational performance.

• Strengthen communication, negotiation, conflict resolution, and employee engagement.

• Understand market positioning, customer value, CRM, and competitive advantage.

• Evaluate the impact of digital transformation and technology on business operations.

• Integrate strategic, financial, operational, HR, and marketing perspectives into effective business decisions.

Why Attend This Course: Wins & Losses!

Wins

• Strategic clarity: Learn how to translate organizational strategy into actionable objectives and KPIs.

• Better decision-making: Develop the ability to combine financial, operational, human, and market information when making decisions.

• Improved efficiency: Identify process inefficiencies and apply continuous improvement principles.

• Financial confidence: Understand financial statements, budgets, costs, profitability, and investment decisions.

• Stronger leadership: Apply modern leadership and change-management approaches.

• Better people management: Improve employee performance, engagement, communication, and conflict management.

• Business integration: Understand how different departments contribute to overall organizational performance.

• Digital readiness: Recognize how technology and digital transformation can support business objectives.

Losses

Without an integrated management perspective, organizations and managers may face:

• Misalignment between strategy and daily operations.

• Poor resource allocation and inefficient processes.

• Decisions based on incomplete financial or operational information.

• Weak coordination between departments.

• Ineffective performance management and employee engagement.

• Increased exposure to operational and financial risks.

• Difficulty adapting to organizational and technological change.

• Missed opportunities for growth, innovation, and competitive advantage.

Frequently Asked Questions FAQ

1. Who should attend this course?

Managers, department heads, supervisors, team leaders, executives, business professionals, and professionals preparing for broader management responsibilities.

2. Is the course suitable for participants from different business functions?

Yes. The program is designed to provide an integrated understanding of management across strategy, operations, finance, HR, marketing, and technology.

3. Will the course cover financial management for non-finance managers?

Yes. Participants will learn how to interpret financial statements, understand key financial ratios, manage budgets, analyze costs, and evaluate basic investment decisions.
