Introduction

The ServiceNow Certified System Administrator CSA course is a comprehensive training program designed to prepare participants for the official ServiceNow CSA certification while building strong, practical system administration skills. The course focuses on the essential components of the ServiceNow platform, including system configuration, IT service management processes, user and access administration, data management, automation, reporting, and system maintenance, all aligned with industry best practices.

This condensed 3-day intensive program combines clear conceptual explanations with practical demonstrations and targeted hands-on exercises. The programme is structured to cover the majority of the essential CSA topics and learning objectives within the available time, with priority given to the knowledge and skills most relevant to ServiceNow system administration and CSA examination preparation.

Course Objectives

By the end of this course, participants will be able to:

- Understand the structure and core capabilities of the ServiceNow platform.
- Navigate the system interface and work efficiently with key applications and modules.
- Manage users, groups, roles, and access permissions.
- Understand and configure core IT service management processes.
- Manage and organize system data using tables, fields, forms, lists, and reports.
- Apply basic automation, workflows, notifications, and service level concepts.
- Perform essential system administration and maintenance activities.
- Prepare confidently for the ServiceNow Certified System Administrator CSA examination.

Course Outlines

Day 1: ServiceNow Platform Fundamentals and User Administration

- Overview of the ServiceNow platform and digital workflows.
- Understanding ServiceNow architecture and the working environment.

UK Training

PARTNER
