Auditing Corporate Governance

Ref: 3311_126500 **Date:** 19 – 23 July 2027 **Location:** Amsterdam (Netherlands) **Fees:** 5900 GBP

Introduction

As corporate governance continues to play a critical role in ensuring the long-term sustainability and ethical operations of organizations, the significance of auditing corporate governance has never been more paramount. This course provides a comprehensive overview of the key components involved in auditing corporate governance, with a special focus on enhancing regulatory compliance, risk management, and ensuring the effectiveness of governance processes. By covering aspects like governance oversight preparation, auditing the audit committee, and IT governance, this program is designed to equip participants with the necessary skills and advanced knowledge to audit and strengthen corporate governance practices within their organizations.

Course Objectives

The corporate governance audit course aims to:

- Conduct an effective audit of corporate governance to assess internal control processes and governance frameworks.
- Understand the role of audit in corporate governance and its importance in identifying risks, improving accountability, and ensuring transparency.
- Evaluate and audit the corporate governance risk assessment processes to mitigate potential risks and enhance the organization's operational efficiency.
- Audit and assist the audit committee in corporate governance, ensuring it meets its regulatory obligations and enhances the effectiveness of governance oversight.
- Assess and improve business continuity planning through internal auditing processes and ensure governance systems align with best practices.
- Audit joint ventures and partnerships to ensure they comply with governance standards and regulations.
