code: PM28 From: 18 - 22 August 2024 Venue: Istanbul (Turkey) - CVK Park Bosphorus Hotel Istanbul Fees: 3900 Pound

Introduction

Value engineering and value analysis is a competitiveness enhancing method that focuses on maximizing the value of a product process, project by making sure it fulfills the clients' needs, at the lowest cost possible. The approach is systematic and includes a multi-step job plan, which in turn uses many tools to do product or process analysis.

The training provides an overview of the whole job plan, including each phase of the job plan, explains the different uses of the methodology, what possible goals can be achieved, and when value engineering is useful.

Course Objectives of Value Analysis, Value Engineering & Waste Elimination

- Acquire in-depth knowledge of value engineering
- Introduce the overview of value engineering consisting of objectives, methodology, and techniques
- Classify the practical applications of value engineering using the project scope budget, CIAPB and preparation of cost models, planning for value engineering services, function analysis, etc
- Apply value engineering to products, processes as well as projects
- Identify and measure the needs that products and processes have to fulfill
- Identify the solution with the best value for all stakeholders
