Accounting, Decision Making & Financial Communication

Code: FA28 From: 5 - 9 January 2025 City: Dubai (UAE) Fees: 3900 Pound

Introduction

Many managers and executives have heard that "accounting is the language of business;" yet have not taken the opportunity to become basically literate. This course offers the accounting language in a structured process. Participants will gain access to the language in a variety of exercises that eventually link to the Annual Reports and to the budgets prepared and managed by the executives. No preparation is necessary except to bring an open mind and a budget document or other financial documents of interest.

By combining techniques, analysis, problems, and examples with real case studies the course provides delegates with key cost awareness and budgetary skills, which is essential in managing and controlling processes/projects in times of increasing global competition where the budgets are inextricably linked with both strategy formulation and cost analysis. This course not only presents the key financial tools generally used, but also explains the broader context of how and where they are applied to obtain meaningful answers. It provides a conceptual backdrop both for the financial/economic dimensions of systematic business management and for understanding the nature of financial statements, analyzing data, planning, and controlling.

Course Objectives of Accounting, Decision Making & Financial Communication

- Understand the content of and relationships between financial statements income statement, balance sheet, and statement of cash flows
- Understand how to use financial statements to evaluate the financial performance of an organization
- Understand discounted cash flow DCF techniques and their application to financial decision making
- Understand how profit margin, asset utilization, and financial leverage are used by managers to maximize the return to investors
- Understand the budgeting process, including performance evaluation
- Understand cost behavior and its impact on management decisions
- Understand the need for and the methods used to allocate overhead
- Communicate and to question financial information effectively
