Audit and Foreign Exchange Reserves Management Process

Code: QM28 From: 11 - 15 November 2024 City: Barcelona (Spain) Fees: 4200 Pound

Introduction

The course will cover the key processes involved in identifying, measuring, assessing the probability of, and prioritizing risks associated with reserves management and assessing the quality of control procedures and protocols. Participants will have the opportunity to learn from their peers in the context of sharing with the group their operational risk management frameworks and how their internal audit function uses the frameworks to assess risks and controls.

Course Objectives of Audit and Foreign Exchange Reserves Management Process

Provide participants with an understanding of how to implement a full-fledged risk-based auditing approach.

- Reserve management service
- Level and adequacy of foreign reserves
- Financial instruments used in reserve management
- Portfolio management
- Investment guidelines and strategic benchmarking
- Market and credit risk control
- Performance measurement

Course Outlines

Day 1

What is Reserve Management and Why is it Important?

- Support and maintain confidence in the policies for monetary and exchange rate management including the capacity to intervene in support of the national or union currency
- Limit external vulnerability by maintaining foreign currency liquidity to absorb shocks during times of crisis or when access to borrowing is curtailed and in doing so
- Provide a level of confidence to markets that a country can meet its external obligations
- Demonstrate the backing of domestic currency by external assets
- Assist the government in meeting its foreign exchange needs and external debt obligations
- Maintain a reserve for national disasters or emergencies
