Professional Certificate Warehouse & Inventory Management

code: SC28 From: 27 - 31 January 2025 Venue: Los Angeles (USA) - Beverly Wilshire, A Four Seasons Hotel Fees: 5700 Pound

Introduction

Inventory and Stock Control Management is critical in operations as inventory is a current asset to a firm. Carrying inventory comes with a certain degree of risk. This risk is a component of the cost of carrying an inventory. When a company stocks items in the warehouse, there is always the risk that the items may fall in real value during the period they are stored. If a company stored parts for their work centers or equipment, the parts in the warehouse could be worth far less than the price that was originally paid, and any losses, excess, obsolete, and mismanaged inventory means a reduction in the company equity.

This training course on Inventory and Stock Control Management focuses on the techniques when companies are looking to reduce warehousing costs in a sustainable way.

Course Objectives of Professional Warehouse & Inventory

- Improve management of inventories reaching from receiving products to storage and delivering
- Professionally manage the inventory and supply chain
- Reduce cost, improve customer satisfaction, and increase safety and productivity.
- Understand the appropriate Inventory methods to be applied
- Establish more accurate forecast demands and maximize the degree of service

Professional Warehouse & Inventory Course Outlines

Day 1
