Strategic Purchasing & Supply Management

Code: SC32 From: 31 May - 4 June 2027 City: Rome (Italy) Fees: 5200 Pound

Introduction

In today's fast-paced business environment, the development and implementation of well-crafted strategies for acquiring goods, parts, equipment, and services is a crucial challenge for any organization aiming to reduce operational costs while improving quality and productivity. This course focuses on key concepts such as Strategic Cost/Price Analysis, Value Analysis, and Total Cost of Ownership TCO, shifting today's supply management focus from tactical operations to a strategic approach necessary to implement processes and methods that ensure world-class performance.

Course Objectives

By the end of this course, participants will:

- Explore the elements of cost in the supplier's price.
- Understand the impact of global labor rates on pricing.
- Learn how to develop a purchasing coding system.
- Understand how volume affects price.
- Discover supplier pricing models.
- Explore issues related to supplier/contractor overhead expenses.
- Gain experience in developing a purchase price index.
- Learn how to get more time to focus on strategic issues.
- Develop skills in negotiation planning and strategies.
- Understand methods of price and cost analysis.
- Apply the concepts of value analysis.
- Learn to develop a "Should Cost" model.
- Explore the types of TCO systems.
- Learn the process of implementing TCO analysis.
