## Feasibility Studies and Business Planning

Code: FA28 From: 19 - 23 August 2024 City: Berlin (Germany) Fees: 4200 Pound

### Introduction

This course "Feasibility Studies and Business Planning" has been specially designed to enable delegates to get involved in effectively developing new ideas into commercial realities. Feasibility studies address issues that influence the success of new projects and assess the advantages and disadvantages of multiple options so they can be ranked and prioritised. The end product of a feasibility study is a clear, concise report which presents the proposed project's objectives, with conclusions and recommendations for the next phase. In this course, we give participants clear guidelines on what a feasibility study should include and how to conduct one. Whether you plan to appoint a specialist team to undertake a feasibility study or intend to do one yourself, this course will guide you through every step and give you the confidence to manage or execute the process effectively.

### Course Objectives of Feasibility Studies and Business Planning

- Establish the linkage between feasibility studies, business plan, and company strategy
- Understand the process of conducting a robust and dynamic feasibility study
- Develop, execute and evaluate a feasibility study
- Identify problems and opportunities within a business and define successful outcomes
- Set business planning objectives
- Integrating feasibility studies within a robust business plan
