The A - Z of Logistics Management

Code: SC28 From: 24 - 28 February 2025 City: Munich (Germany) Fees: 4700 Pound

Introduction

Logistics management is an essential function governing the flow of goods through a supply chain. This course brings you up to date with the latest logistics models and practices. The course's main focus is on the optimization of transport, warehouse, and inventory management activities. In addition, it covers the Supply Chain Operations Reference SCOR framework for managing logistics key performance indicators.

Course Objectives of The A - Z of Logistics Management

- Recognize modern supply chain and logistics trends as a basis for sustainable performance
- Employ qualitative and quantitative material forecasting techniques for a streamlined logistical operation
- Describe the role of transportation in logistics and identify opportunities for operational improvement
- Identify the role of warehousing, focusing on operational throughput and performance optimization
- Apply Supply Chain Operations Reference SCOR framework

The A - Z of Logistics Management Course Outlines
