Achieving Performance Excellence through Benchmarking

Code: LM28 From: 27 - 31 July 2026 City: Malaga (Spain) Fees: 4400 Pound

Introduction

A key element of continuous improvement is benchmarking. Without benchmarking, organizations cannot gauge how competitive they are or identify where to focus their improvement efforts. Benchmarking helps organizations balance internal problem-solving and improvement activities with the realities of the external environment. This includes industries performing similar functions, geographically separated businesses, and non-profit or public institutions. Under the right conditions, benchmarking can even be performed by direct competitors, leading to improved performance benefiting all stakeholders. Benchmarking not only provides awareness of where the "best" performance lies but, more importantly, it helps create a paradigm shift that internally focused teams may sometimes fail to achieve. It fosters the creative adoption and adaptation of "best" practices, assisting organizations in gaining and maintaining a competitive advantage.

Course Objectives

By the end of this course on Achieving Performance Excellence through Benchmarking, participants will be able to:

- Understand the importance of performance measurement and how it contributes to performance excellence.
- Set up an effective performance measurement system for shared services.
- Interpret performance measurement results to determine whether processes are ready for improvement.
- Learn the necessary actions to take when processes are not yet ready for improvement.
- Understand the principles of continuous improvement and how to apply them to enhance process performance.
- Gain knowledge of benchmarking, its importance, and how to implement successful benchmarking projects.
- Identify and implement best practices within the organization, adjusting them where necessary for optimal outcomes.

Course Outlines

Day 1: Performance Measurement: The Starting Point for Improvement

- The Need for Performance Measurement.
- Using Data Constructively: How to avoid misuse of data in performance improvement.
- Methods of Selecting Performance Measures.
- Developing a Framework for Performance Measurement.
- Understanding Variation: Why it is key to evaluating performance.
- Histograms, Run Charts, and Control Charts: What they tell us about performance.
- Case Study: The Rods Experiment for practical understanding of performance variation.

Day 2: Continuous Improvement
