Creative Problem Solving

Ref: 321403_133715 **Date:** 14 – 18 December 2026 **Location:** Berlin (Germany) **Fees:** 5200 GBP

Introduction

Are you tired of using traditional problem-solving methods that no longer yield effective results? Our Creative Problem Solving course is designed to break free from conventional thinking and introduce you to innovative problem-solving techniques. Whether you're tackling business challenges or personal obstacles, this course will help you develop a structured yet creative problem-solving process. Through engaging activities and real-world scenarios, you'll explore creative thinking and problem-solving strategies that will improve your decision-making, spark creativity, and unlock new opportunities. Perfect for professionals and teams aiming to boost their problem-solving skills and enhance their creativity, this course will guide you in transforming problems into exciting solutions.

Course Objectives

By the end of this course, you will:

- Define creative problem solving and understand its key principles.
- Explore the relationship between creativity and problem solving, and how they can work together to produce innovative solutions.
- Learn various creative problem-solving techniques and methods to generate new ideas and tackle challenges.
- Build the ability to use critical thinking alongside creative problem solving for a more holistic approach to challenges.
- Develop strategies for applying creative problem solving in both personal and professional settings.
- Gain confidence in applying the steps of creative problem solving and implementing actionable solutions.
- Understand how to be a creative problem solver and foster a mindset of continuous innovation.
