## Feasibility Studies: Preparation, Analysis and Evaluation

Code: FA28 From: 21 - 25 July 2025 City: Lisbon (Portugal) Fees: 4400 Pound

### Introduction

This course provides professionals a firm basis to determine whether the project has sufficient merit to continue into a more detailed phase. This is achieved by means of a feasibility study. A well-developed feasibility study is an essential foundation to allow project analysis and design activities to commence in a focused manner. It either refines a business case by examining the range of possible options and potential issues or forms a basis for its development.

Feasibility studies address issues that could influence the success of a potential project and assess the advantages and disadvantages of each option so they can be ranked. The end product of the study is a clear, concise report which presents the proposed project's objectives, with conclusions and recommendations for the next phase.

### Course Objectives

- Employ individual leadership performance by identifying methods of completing feasibility studies.
- Discover effective project planning for feasibility studies for individuals and teams.
- Examine project management techniques to plan and organize feasibility studies.
- Use stakeholder management to involve stakeholders in feasibility studies.
- Apply useful planning, organization, and people management skills.

### Course Outlines

#### Day 1

##### Planning a Feasibility Study

- Introductions, course purpose, goals, and objectives.
- What are feasibility studies and why are they important?
- Feasibility studies: definitions, principles, and concepts.
- Identifying where a feasibility study occurs in a project plan.
- Creating and protecting value.
- Understanding the business need.

#### Day 2

##### Considering the Options

- Distinguishing between needs and wants.
- Performing an options analysis.
- Creative thinking and problem-solving.
- Consideration of the risks and opportunities.
