Petroleum Trading & International Law for Energy Markets

Ref: 3278_134496 **Date:** 9 – 13 August 2027 **Location:** Amsterdam (Netherlands) **Fees:** 5900 GBP

Introduction

The Petroleum Trading & International Law program is an intensive one-week course designed to provide participants with an in-depth understanding of the global petroleum market and the associated legal frameworks. By integrating technical, financial, and legal aspects, this course offers a comprehensive exploration of petroleum trading, risk management, international contracts, and regulatory compliance. Participants will acquire the knowledge necessary to manage legal risks, understand cross-border regulations, and navigate the complexities of the oil and gas industry in a rapidly changing global environment. This course is a perfect opportunity for professionals in the oil and gas sector, legal advisors, and consultants to gain essential knowledge to deal with legal challenges in petroleum trading.

Course Objectives

- Industry and Trading Principles: Develop a solid understanding of the petroleum industry and the principles behind international petroleum trading.
- Legal Frameworks: Gain insights into the legal structures governing petroleum trading, including international treaties, contracts, and regulatory compliance in the oil and gas sector.
- Financial Strategies: Learn about financial instruments and strategies for managing trading and price risks in the petroleum industry.
- Logistics and Maritime Law: Explore legal considerations in the transportation, logistics, and maritime law specific to the oil and gas sector.
- Dispute Management: Enhance your ability to manage disputes, understand geopolitical risks, and adapt to the evolving energy market.

Course Outlines

Day 1: Overview of Petroleum Industry and International Trading Context

- Introduction to the Global Oil and Gas Industry:
  - Evolution, market significance, and major industry players.
  - Breakdown of the oil and gas industry: upstream, midstream, and downstream sectors.
  - Role of OPEC, non-OPEC countries, and global energy organizations.
