BLACKBIRD FOR TRAINING

Employee safety and risk management in the work environment

10 – 14 May 2027
Berlin (Germany)

Employee safety and risk management in the work environment

Ref: 321581_134835 **Date:** 10 – 14 May 2027 **Location:** Berlin (Germany) **Fees:** 5200 GBP

Introduction

This course is designed to meet the needs of professionals in health, safety, security, and risk management, addressing the requirements of organizations across both public and private sectors. Safety and security departments are among the most crucial components of modern institutions and facilities, playing a vital role in protecting lives and property. Their importance makes them an essential part of any organization's training plans. This course provides the opportunity to apply the latest international practices and modern methodologies to enhance workplace safety culture, occupational health management, and risk mitigation strategies.

Participants will gain in-depth knowledge of employee safety training, workplace risk management, and will learn how to effectively reduce workplace hazards and prevent accidents. The training will help improve the performance of safety departments and raise the quality standards in managing health and safety policies within organizations.

Course Objectives

By the end of this course, participants will be able to:

- Identify key procedures that provide occupational safety for employees and reduce the risk of injury, creating a safer work environment.
- Understand the rights and responsibilities of both employees and employers concerning workplace safety.
- Learn how to comply with international safety standards and ensure adherence to public safety regulations.
- Identify common risks in the workplace and take effective measures to mitigate them.
- Develop skills in conducting workplace risk assessments and writing comprehensive safety reports.
- Learn risk mitigation strategies and apply them to create a safer workplace.
- Understand how to improve workplace safety culture and implement changes to foster a proactive safety culture.

Course Outlines
