The Contracts & Project Management MBA

Code: PM28 From: 15 - 26 September 2025 City: Lisbon (Portugal) Fees: 7400 Pound

Introduction

World-class organizations understand the significant benefits of lower total costs and higher productivity that come from mastering best practices in project and contract management. By focusing on the most effective processes, methods, and techniques, this Contracts & Project Management MBA course offers a great opportunity for professionals involved in project and contract management to enhance their skills.

Whether you are a fresh graduate or an experienced professional seeking to advance in project management or contract management, this course equips you with the knowledge and tools needed to excel in every stage of project and contract life cycles.

Course Objectives

Upon completing this training, participants will be able to:

- Manage the challenges associated with volatile material pricing and risk management.
- Understand the importance of planning and how to manage the planning process efficiently.
- Learn about contract types and how they transfer risks.
- Take massive action to implement effective strategies for project success.
- Explore various pricing models used in preparing proposals.
- Develop methods to keep the team focused on delivering key project objectives.
- Build strong negotiation skills to align with the organization's goals.
- Set up and operate the disciplines necessary for monitoring and controlling projects.
- Understand important aspects of contractor pricing and cost analysis.

Course Outlines

Day 1: The Fundamentals of Project Management

- Key definitions in project management.
- The project life-cycle and managing the triple constraint time, cost, scope.
- Factors affecting project complexity.
- Key strategies in managing projects.
- Key financial concepts in project management.

Day 2: Project Planning and Organizing

- The 20 essential project management steps.
- Defining project scope and developing work and cost breakdown structures.
- Roles and responsibilities in project management.
