Code: PM28 From: 3 - 14 August 2026 City: Istanbul (Turkey) Fees: 6600 Pound

Introduction

Your ability as a project manager to demonstrate best practices in project management—both on the job and through professional certification—is essential to compete in today's fast-paced, highly technical, and dispersed workplace. The skills and knowledge you gain in this course will help you avoid making costly mistakes and increase your competitive edge.

In this course, you will apply the generally recognized practices of project management acknowledged by the Project Management Institute PMI® to successfully manage projects. You will also learn about the project management lifecycle and become equipped with the tools to earn your PMP certificate, a crucial asset for professionals aiming to excel in the field of project management.

Course Objectives

By the end of this course, participants will be able to:

- Define the fundamentals of project management and understand its core principles.
- Understand the role of project management within the organization and its impact on business success.
- Apply the project management methodology using best practices in project planning, execution, and control.
- Initiate a project and develop a comprehensive project management plan.
- Plan project schedules, costs, quality, resources, and procurement effectively.
- Plan for risk and stakeholder engagement while ensuring smooth communication throughout the project.
- Execute the project, working closely with stakeholders and ensuring alignment with project objectives.
- Monitor project work, scope, risks, stakeholder engagement, and communications.
- Control project changes, including scope, schedule, costs, quality, resources, and procurement.
- Close the project successfully, ensuring all goals and deliverables are met.
