### Decision Analysis for Operation and Maintenance Professionals

Code: OG28 From: 6 - 10 April 2025 City: Istanbul (Turkey) Fees: 4400 Pound

#### Introduction

This program examines lean thinking and techniques for decision analysis with emphasis on the lean approach and responsiveness to the customer requirements. Decision-making is the most central human activity, intrinsic in our biology, and done both consciously and unconsciously. We need it to survive. Taking a decision is not just a question of selecting the best alternative. Often one needs to prioritize all the alternatives for resource allocation among a portfolio of option, or to examine the effect of changes introduced to initial judgments.

### Course Objectives of Decision Analysis for Operation and Maintenance Professionals

- Improve productivity through the use of better, timelier information.
- Understand how world-class organizations solve common asset management problems.
- · Optimize planning and scheduling resources.
- · Carry out optimized failure analyses.
- Optimize asset management budgets by the avoidance of unplanned equipment failures in service.
- Develop a practical approach of an action plan to utilize these technologies in their areas of responsibility, fitting them into the overall strategy, and measuring benefits.
