Food Safety Management

Code: CS28 From: 10 - 14 November 2025 City: Kuala Lumpur (Malaysia) Fees: 4900 Pound

Introduction

This Food Safety Management training course will provide deeper insights on how to implement an effective and robust Food Safety Policy in any organization in the food production, supply, and consumption chain. This training course will enable an organization to minimize the risk of exposing itself to legal and financial risks as a result of failing to deliver safe and healthy food to its customers and/or end-consumers.

Accomplishing the above requires adequate personnel training and a good understanding of the core principles of Food Safety. This Food Safety Management training course provides an ideal opportunity for participants to broaden their understanding of the basic principles of a Food Safety Management System FSMS, as these are defined in ISO 22000:2018.

Course Objectives

- Set up the HACCP team that has the knowledge and experience to develop and implement an effective HACCP system in their organization.
- Perform the hazard analysis in order to determine the preventive measures necessary to reduce the risk within acceptable levels.
- Perform the categorization into Operational Prerequisite Programs OPRPs and Critical Control Points CCPs.
- Design and implement monitoring systems aiming at controlling and improving the food safety management system.
- Apply evaluation and improvement of logistics in accordance with the requirements of legislation and international food safety standards.

Course Outlines

Day 1: Introduction to and basic definitions of Food Safety Management Systems FSMS

- Food Safety Management System principles in light of the new ISO22 000:2018.
- ISO22000:2005 ISO22000:2018: The Key differences.
