Advanced Audit - Risk Management

Code: QM28 From: 17 - 21 November 2025 City: Geneva (Switzerland) Fees: 4700 Pound

Introduction

The need to manage risks is increasingly recognized as essential to effective corporate governance and to maintain an effective system of internal control. Internal audit plays a key role in providing assurance that risks to the organization are properly managed. Risk-based auditing links internal audit to an organization's overall risk management framework.

This course provides participants with the knowledge to develop an audit universe and risk-based internal audit plan. This course also addresses emerging and advanced risk management topics such as governance risk, strategic risk, fraud risk, information technology risk, and auditing the risk management process.

This course is designed for senior internal audit practitioners and audit managers who want to build on their knowledge and increase their value to the organization by developing effective risk-based audit plans that address emerging risks.

Course Objectives

- Identify corporate governance principles.
- Explain the relationship between governance principles and COSO frameworks.
- Explain the relationship between governance, risk and control.
- Identify strategy risk audits.
- Identify the strategy process audits.
- Identify types of fraud.
- Examine an anti-fraud program and the role of risk assessment.
- Identify IT risk assessment frameworks.
- Discuss cybersecurity, information security, and information technology IT governance risks.
- Assess enterprise risk management process risks.
- Apply enterprise risk management maturity and comprehensive assessment approaches.
- Develop an auditable universe risk assessment.
- Apply risk identification, measurement, and prioritization techniques.
