1 – 5 March 2027
Orlando, Florida (USA)

Project Management Professional (PMP)

Ref: 321660_142928 **Date:** 1 – 5 March 2027 **Location:** Orlando, Florida (USA) **Fees:** 5900 GBP

Introduction

In today's competitive and rapidly evolving work environment, having the skills to demonstrate best practices in project management is crucial for success. As a Certified Project Manager Professional PMP, you can gain a competitive edge by mastering the strategies and techniques acknowledged by the Project Management Institute PMI® through professional certification. This professional project management course offers you the tools and knowledge you need to effectively manage projects, avoid costly mistakes, and elevate your career prospects.

Through this course, you will learn the essential elements of PMP certification training and gain a deep understanding of project management professional skills. Whether you're seeking a PMP certification or simply looking to improve your project management abilities, this course provides a comprehensive pathway to enhancing your project management professional qualifications and expertise.

Course Objectives

By the end of this course, you will:

- Understand key terms and the relationship between portfolio, program, and project management.
- Recognize how organizational influences affect the methodologies used in project management.
- Identify the integration of various processes and activities required to manage a project successfully.
- Break down the scope of the project, ensuring that all required work is included.
- Estimate the duration of activities required to complete the project.
- Develop accurate project budgets by estimating activity costs.
- Establish project quality policies and objectives.
- Assemble a project team and effectively manage its performance.
- Learn how to communicate project information clearly and efficiently.
- Develop a project risk management plan and analyze potential risks.
- Plan the procurement steps necessary for acquiring products and services needed for the project.
- Understand how to manage stakeholder expectations and their impact on project outcomes.
