Business Data Analytics

Code: IT28 From: 13 - 17 January 2025 City: Berlin (Germany) Fees: 4700 Pound

Introduction

In this day and age, it is no surprise for the corporate staff to be overwhelmed by the abundance of unstructured data. ERPs and databases have evolved to a point where they can house amazingly large amounts of data. The question now is, what do you do with this data to add value? This program will introduce Business Intelligence BI, hands-on, to allow you to clean, normalize, and interpret large volumes of data. You will be able to establish historical relationships, analyse the current situation and predict future strategies. The application of BI is borderless, covering operational, tactical, and strategic business decisions. It spans all departments and cascades down to all users who perform data cleansing, reporting, analysis, modeling, integration, and automation. In this course, we use MS Excel exclusively as an ultimate and readily available BI tool allowing you to develop an exclusive level of expertise and add immediate value to your job and company.

Course Objectives

- Boost Excel Business Intelligence BI expertise in data slicing and dicing, data massaging, and data aggregation and modeling
- Perform data normalization, consolidation, report writing, analysis, and reconciliation
- Develop dynamic BI models, dashboards, scorecards, and flash management reports by linking-up Excel with Access, Web, Text, Internet, SQL, ERPs, and other databases
- Advance and enhance the look and feel of reports using dynamic visualization techniques
- Acquire numerous tips and tricks that enable them to work efficiently

Course Outlines

Day 1

Data Visualization

- Defining Data, Information, and Insight
- Comparing Data Visualisation and Infographics
- Using Charts and Graphics for Data Visualisation
- Designing Visuals and Infographics for Non-financial Users
- Using Excel and PowerPoint for Data Visualisation
