## Introduction to Monetary and Financial Statistics for Central Banks

Code: FA28 From: 23 September - 4 October 2024 City: Amsterdam (Netherlands) Fees: 7500 Pound

### Introduction

This course provides participants with an introduction to the compilation of monetary statistics covering the central bank CB and other depository corporations ODCs in accordance with international standards. Course materials are based on the Monetary and Financial Statistics Manual and Compilation Guide MFSMCG. The course discusses the principles of residency and sectorization of institutional units, the characteristics, and types of financial instruments, valuation principles, and other accounting issues that are relevant to the compilation of monetary statistics. Participants also become familiar with the defining characteristics of depository corporations DCs, notably their role as money issuers, and with the main principles on which analysis of monetary and credit aggregates is based. The course consists of lectures, and exercises covering practical aspects of compiling monetary statistics, especially the use of financial statements for filling out standardized report forms SRFs 1SR and 2SR and the derivation of the respective surveys for the CB, ODCs, and the consolidated DCs sector. Participants should be prepared to ask questions and discuss challenges related to MFS compilation practices. This course is an abbreviated version of the longer, introductory MFS course traditionally offered by STA in person.

### Course Objectives: Introduction to Monetary and Financial Statistics for Central Banks

- Compile monetary statistics sectoral balance sheets and surveys for the CB, ODC, and DC sectors
- Participants should be able to properly classify balance sheet accounts according to residency, counterpart sector, and type of financial instrument, and to correctly apply valuation and other accounting principles.
- Understand how the DCs survey and the main monetary and credit aggregates support the analysis of monetary policy.
- The objective of this course is to provide an introduction to monetary and financial statistics for central banks.
- Participants will gain an understanding of the scope and importance of data collection and analysis, and be able to use the data to better understand and analyze the impact of monetary and financial policies.

### Course Outline: Introduction to Monetary and Financial Statistics for Central Banks

#### Day 1

- Introduction to Monetary and Financial Statistics
- Overview of Central Banks
- Understanding the scope of Data Collection

#### Day 2

- Money and Credit Aggregates
- Reserve Money and Currency Aggregates

The logo for UK Training Partner features the text 'UK Training' in a small, black, sans-serif font above the word 'PARTNER' in a large, bold, black, sans-serif font. The text is positioned over a background of a chessboard with several chess pieces (a king, a pawn, and a knight) and a series of concentric white circles radiating from behind the pieces.

- Balance of Payments and External Sector Statistics

### Day 3

- Compile monetary statistics for the CB, ODC, and DC sectors according to the methodology recommended by the MFSMCG using the SRFs 1SR and 2SR.
- Interest Rate Statistics
- Financial Soundness Indicators
- Financial Market Statistics

### Day 4

- Time Series Analysis and Trends in Monetary and Financial Statistics
- Understanding the Interdependence of Data
- Analyzing the Impact of Monetary and Financial Policies
