# Information technology in the organization and management of libraries

Code: IT28 From: 2 - 6 June 2025 City: London (UK) Fees: 5100 Pound

## Introduction

The course specializes in studying the design, development, and support of computer-based information systems and their applications, where computers and software applications are used to convert, store, protect, process, and send information in addition to secure retrieval. Those who study information technology specialization are called computer specialists or information technology specialists. The course contributes to providing the participants with great skills in managing information security, and great skills in web design, increases their experience in protecting the information infrastructure, and enables the participants to have complete control over the information in terms of determining who will receive the data.

## Course Objectives

- Gain advanced skills for those involved in the field of library management
- Comprehensive knowledge of the work of cataloging and classifying books and others
- Focusing on how to benefit from advanced information technology in the field of libraries.
- Provide participants with great experience in the field of data monitoring through applications that enable knowledge of the movement of data entering and exiting.
- Introduce participants to physical protection methods, as there are many simple methods that must be followed in order to maintain information security.
