## AWS Cloud Practitioner Certification

Code: IT32 From: 26 - 30 July 2026 City: Istanbul (Turkey) Fees: 4900 Pound

### Introduction

The AWS Cloud Practitioner Certification is a foundational credential offered by Amazon Web Services, designed to validate a clear understanding of AWS Cloud concepts, services, and best practices. It serves as an ideal starting point for anyone looking to build a solid grounding in cloud computing and how AWS environments operate.

This 5-day course provides a structured and practical introduction to AWS Cloud, combining essential theory with real-world context. Participants will explore AWS global infrastructure, core services, and key operational principles, while also gaining insight into security, pricing, and cost optimization.

Through a well-balanced learning approach, the course helps learners build confidence in navigating AWS environments and prepares them effectively for the AWS Cloud Practitioner Certification exam.

### Course Objectives

By the end of this course, participants will be able to:

- Develop a strong understanding of AWS Cloud concepts, terminology, and services.
- Identify and apply AWS core services and their real-world use cases.
- Understand architectural best practices and design principles within AWS.
- Gain knowledge of AWS pricing models, billing processes, and cost optimization strategies.
- Understand the fundamentals of AWS security and AWS Identity and Access Management IAM.
- Prepare confidently for the AWS Cloud Practitioner Certification exam.
