## Governance, Risk, and Compliance (GRC)

Code: CT28 From: 30 September - 4 October 2024 City: Kuala Lumpur (Malaysia) Fees: 4400 Pound

### Introduction

Corporate/Public governance and risk management are critical topics that have recently started attracting more attention in business schools and among legislatures, with this trend only increasing. While there are different models for corporate governance and risk management, all of them aim at organizing the relationship between the organisation and stakeholders and controlling risks effectively. What is more important is the fact that 'Governance, Risk Management, Compliance and Effective Internal Controls' are all part of one system. Unfortunately, not all companies have this avant-garde look towards this system. This course includes discussions about board structure, committees, and their functions while covering the detailed process of managing risks as per the Committee of Sponsoring Organizations of the Treadway Commission COSO requirements. In addition, the course includes a discussion on internal controls that are used to respond to the risks in different areas of the corporation. Compliance is also covered per the latest developments, an integral part of this course as well is the tools to audit all these components as per OECD and other international standards.

### Course Objectives

- Define corporate/public governance and its relation to risk management and internal controls
- Discuss the roles and responsibilities of the various stakeholders in a private or public organization
- List the functions of corporate/public governance and differentiate between the various models
- Identify the areas of risk management and its internal and external environment changes
- Identify the proper controls to be implemented in various business cycles
