Web Development and Best Practices

Code: IT28 From: 25 - 29 November 2024 City: Kuala Lumpur (Malaysia) Fees: 4900 Pound

Introduction

The field of web development is constantly evolving, and it is crucial for developers to stay up to date with the latest technologies and best practices. This 5-day course aims to provide participants with a comprehensive introduction to web development and equip them with the necessary skills to build modern, high-quality websites. From frontend to backend development, this course covers essential concepts, tools, and techniques used in the industry.

Course Objectives

- Understand the fundamentals of web development, including the client-server architecture and HTTP protocol.
- Gain knowledge of HTML, CSS, and JavaScript to create responsive and interactive web pages.
- Explore frontend frameworks and libraries, such as React or Angular, to build dynamic user interfaces.
- Learn about backend development using server-side technologies like Node.js and databases such as MongoDB.
- Understand the importance of web accessibility, security, and performance optimization.
- Familiarize yourself with version control systems, like Git, for collaborative web development.
- Gain practical experience through hands-on projects and exercises.

Course Outlines

Day 1: Introduction to Web Development

- Overview of web development and its importance.
- Client-server architecture and HTTP protocol.
- Introduction to HTML and creating web pages.
- Basics of CSS for styling and layout.
- Introduction to JavaScript for Interactivity.

Day 2: Frontend Development

- Responsive web design and CSS frameworks.
- Advanced CSS techniques for layouts and animations.
- Introduction to frontend frameworks e.g., React, Angular.
- Managing state in frontend applications.
- Introduction to API integration and AJAX.

Day 3: Backend Development

- Introduction to backend development and server-side technologies.

- Basics of Node.js and Express.js framework.
- Working with databases e.g., MongoDB.
- Introduction to RESTful APIs.
- User authentication and session management.

Day 4: Web Development Best Practices

- Web accessibility and inclusive design.
- Security best practices e.g., input validation, encryption.
- Performance optimization techniques e.g., caching, minification.
- Search engine optimization SEO basics.
- Introduction to testing and debugging.

Day 5: Project and Deployment

- Working on a real-world web development project.
- Collaborative development using Git and GitHub.
- Deployment options for web applications e.g., hosting, cloud platforms.
- Continuous integration and deployment CI/CD pipelines.
- Final project presentation and wrap-up.
