Advanced Supply Chain Management

Code: SC28 From: 30 June - 4 July 2025 City: Berlin (Germany) Fees: 4200 Pound

Introduction

Building on your existing certifications as a Certified International Supply Chain Manager CISC M and Certified International Supply Chain Professional CISC P, the "Advanced Supply Chain Management" course is designed to elevate your expertise. This 5-day course provides an in-depth exploration of advanced supply chain management concepts, strategies, and technologies. Tailored for professionals aiming to enhance their supply chain management skills further, this course prepares you for leadership roles in this critical field.

Course Objectives

- Expand your understanding of advanced supply chain management concepts, allowing you to apply modern frameworks and theories.
- Develop the skills required for strategic decision-making in supply chain management, helping you increase competitiveness and reduce risks.
- Explore the latest technologies and trends reshaping supply chain management, including advanced analytics, artificial intelligence, and sustainable supply chain strategies.
- Optimize supply chain processes to improve efficiency, reduce costs, and enhance sustainability.
- Prepare for leadership roles in supply chain management by cultivating skills in leadership and change management.
- Network with peers and industry experts, sharing insights and experiences in global supply chain management.

Course Outlines

Day 1: Advanced Supply Chain Strategy

- Discover advanced strategies for designing and implementing supply chain systems that provide a competitive edge.
- Demand forecasting strategies to support informed decision-making.
- Advanced supply chain risk management, focusing on mitigating risks to ensure operational resilience.

Day 2: Technology and Innovation in Supply Chain

- Understand and leverage emerging supply chain technologies such as Blockchain and IoT to increase transparency and efficiency.
- Utilize advanced analytics and artificial intelligence to optimize decision-making in supply chain management.
- Real-world case studies demonstrating the impact of innovation on supply chains.

Day 3: Sustainable Supply Chain Management

A graphic of a chessboard with several chess pieces (a king, a queen, a rook, and a knight) positioned on it. The board is white and black, and the pieces are gold and silver. The text 'UK Training PARTNER' is overlaid on the right side of the board.

UK Training
PARTNER

- Develop sustainable supply chain strategies to enhance corporate responsibility and environmental performance.
- Implement green logistics and ensure environmental responsibility within the supply chain.
- Measure and report on supply chain sustainability, meeting stakeholder expectations and regulatory requirements.

Day 4: Advanced Supply Chain Optimization

- Optimize processes with advanced techniques in inventory management and lean principles like Six Sigma.
- Manage supplier relationships to build strong and sustainable partnerships, enhancing supply chain efficiency.

Day 5: Leadership in Supply Chain Management

- Develop leadership skills for supply chain executives, focusing on guiding teams in a rapidly evolving industry.
- Learn strategies for change management in the supply chain, ensuring smooth transitions and innovation adoption.
- Present final projects, applying the knowledge and skills gained throughout the course.

Why This Course Is Important

Supply chain management is a critical component of modern business success, impacting operational efficiency and competitive advantage. This course equips you with the tools to tackle today's challenges in supply chain risk management, supply chain technology, and sustainability, preparing you for advanced leadership roles in this dynamic and constantly evolving field.
