Security, compliance, and Identity Fundamentals SC 900

Code: IT28 From: 4 - 8 November 2024 City: Paris (France) Fees: 4900 Pound

Introduction

In a world increasingly reliant on digital technology, safeguarding data, ensuring compliance, and managing identities are paramount concerns. The "Security, Compliance, and Identity Fundamentals SC 900 Training" is a 5-day course that provides a comprehensive foundation in these critical areas. Designed for individuals new to cybersecurity, this course empowers participants with the knowledge and skills necessary to understand security principles, compliance regulations, and identity management.

Course Objectives of Security, compliance, and Identity Fundamentals SC 900

- Introduction to Security, Compliance, and Identity: Provide a solid understanding of the fundamental concepts and importance of security, compliance, and identity in today's digital landscape.
- Security Basics: Cover the basics of security, including cybersecurity threats, defense mechanisms, and the importance of data protection.
- Compliance Frameworks: Explore various compliance frameworks and regulations, emphasizing their significance in maintaining data privacy and security.
- Identity and Access Management IAM: Learn the essentials of IAM, including user authentication, authorization, and management.
- Security Tools and Technologies: Familiarize participants with the tools and technologies commonly used in cybersecurity and identity management.
- Security Best Practices: Understand best practices for safeguarding digital assets and data.
- Data Privacy and Compliance: Dive into data privacy laws and regulations such as GDPR and HIPAA.
- Security Threats and Mitigation: Identify common security threats and how to mitigate them.
- Identity Protection: Explore methods for protecting and managing user identities within an organization.
- Security Policies and Procedures: Learn about the creation and enforcement of security policies and procedures.
