Project Appraisal and Risk Management

Code: LM28 From: 24 - 28 February 2025 City: Toronto (Canada) Fees: 4700 Pound

Introduction

This training seminar emphasizes the significance of appraising projects in terms of viability, feasibility, and associated risks. When an organization seeks a solution to a business problem or opportunity, it must plan and develop a project that effectively implements this solution. At various points throughout the project lifecycle, the organization needs to conduct a thorough project appraisal to ensure alignment with strategic goals, achievement of objectives, and resolution of the identified problem. Additionally, the organization must understand all risks that may impact both the organization and the project itself. In this context, project appraisal serves as a crucial process for analyzing, approving, or terminating projects.

Project management heavily emphasizes project risk management; the ability to seize opportunities, minimize threats, and optimize outcomes is essential. Often, risk management is treated as a reactive process or, worse, neglected entirely. This course explores a proactive approach to both aspects of risk: threats and opportunities, founded on a clear understanding of both qualitative and quantitative methods of project risk management.

Course Objectives

By the end of this course, participants will be able to:

- Understand projects from a strategic perspective: Participants will learn how project appraisal plays a vital role in achieving the organization's strategic goals.
- Identify key gateways in the project lifecycle: Highlighting critical decision points ensures the project's direction remains aligned with its objectives.
- Comprehend the role of the project steering group: Learning how steering groups influence key decisions for project success.
- Grasp the key contents of essential documentation: This includes preparing documents necessary for effective project appraisal.
- Awareness of project financing: Understanding financial factors and their impact on project success.
- Guide and apply a Risk Management Process: Participants will be equipped to implement risk management strategies effectively.
- Identify procurement strategies and contracts: Learning how to select appropriate suppliers and contracts.
- Understand the benefits of Earned Value Management EVM: Gaining insights into measuring project performance financially.
