Certificate in Advanced Financial Modeling

Code: FA32 From: 28 September - 2 October 2026 City: Kuala Lumpur (Malaysia) Fees: 4200 Pound

Introduction

Organizations today cannot afford to make poor investment decisions due to their long-term impact on business success. Mastering financial modeling techniques is crucial as they form the backbone of effective decision-making in investments. This advanced financial modeling course is designed to equip participants with the knowledge and skills to create comprehensive models that drive informed decisions, improve forecasting accuracy, and optimize valuations. Whether you're a beginner exploring the basics of financial modeling or a professional seeking to refine your skills in advanced financial modeling and valuation, this course has everything you need to excel.

Course Objectives

By the end of this course, participants will:

- Master financial modeling by utilizing powerful Excel functions for seamless model creation.
- Learn the types of financial modeling and how to apply financial modeling techniques effectively.
- Develop robust models to forecast investments and calculate valuations of projects and companies.
- Apply advanced financial modeling methods to create comprehensive and accurate financial models.
- Recognize best practices and unique considerations in financial modeling and valuation processes.

Course Outlines

Day 1: Advanced Excel for Financial Modeling

- Essential Excel tips to improve speed and accuracy in financial modeling prep.
- Logical tests, protecting data, and database activities.
- Creating interactive financial modeling Excel templates using Pivot Tables, grouping, and lookup functions.
- The power of interactive graphs and data tables for better insights.

Day 2: Fundamentals of Financial Modeling

- Understanding the meaning of financial modeling and its significance in investments.
- Applying the time value of money: PV, FV, NPV, IRR, and MIRR.
- Preparing loan amortization schedules and calculating CAGR and effective interest rates.
- Forecasting revenues, costs, and cash flows to build comprehensive models.
- Understanding the interplay between income statements and cash flow projections.

Day 3: Valuation Techniques

- Utilizing ratio analysis to create projected financial statements.
- Exploring types of financial modeling, including debt capacity and credit analysis.

A graphic of a chessboard with several chess pieces (a king, a queen, a rook, and a pawn) on it, set against a background of concentric circles.
