## Certified Information Security Manager (CISM)

Code: IT28 From: 15 - 19 June 2025 City: Amman (Jordan) Fees: 3900 Pound

### Introduction

The Certified Information Security Manager CISM training course is a comprehensive program designed to provide participants with the knowledge and skills required to excel in the field of information security management. The course covers essential concepts, best practices, and techniques necessary for effective information security governance, risk management, program development, and incident management.

### Course Objectives

- Understand the core principles and concepts of information security management.
  - Acquire knowledge of the four domains covered in the course:
    - Information Security Governance
    - Risk Management
    - Information Security Program Development and Management
    - Information Security Incident Management.
- Learn how to establish and maintain an information security governance framework and supporting processes.
- Develop the skills to identify and manage information security risks to achieve business objectives.
- Gain insights into the development, implementation, and management of information security programs aligned with organizational goals and compliance requirements.
- Learn effective incident response and management techniques to mitigate the impact of security incidents.

### Course Outlines

#### Day 1

- Introduction to Information Security Management:
  - Overview of information security management principles, frameworks, and Standards.
- Information Security Governance:
  - Establishing and maintaining an information security governance framework, roles and responsibilities, and organizational structures.
- Information Risk Management:
  - Identification, assessment, and mitigation of information security risks.
- Information Security Program Development and Management:

UK Training  
**PARTNER**
