Code: PM28 From: 13 - 17 July 2025 City: Washington (USA) Fees: 4700 Pound

Introduction

For Construction Project Management, advanced knowledge and skills are needed. The overall aim of this course is to provide participants with the knowledge and skills needed to perform an in-depth analysis of a construction project during the planning and implementation phases. Participants in this interactive course will learn all the critical tools and techniques required to make decisions to optimize the successful execution of a project in a dynamic environment.

Course Objectives of Construction Project Management

- Define construction project management frameworks, processes, and tools in compliance with the Project Management Institute PMI standards.
- Apply different techniques that will assist in the project selection process.
- Identify different methods for cost estimating and project budgeting.
- Manage time and cost deviations by applying 'earned value analysis'.
- Employ risk management plans and apply risk response strategies to ensure successful implementation of the project.
